INTRODUCTION
TO THE CREATION OF THE
UNIVERSE ACCORDING TO GENESIS

CRISTO RAUL Y& S

This is an abridged translation from the Original Spanish Book “La Creación del Universo según el Génesis. Una Introducción a la Cosmología del Siglo XXI.” You can download the Original Spanish Book from

www.cristoraul.org “ENGLISH DOOR”.

This Book ON THE CREACION OF THE UNIVERSE belongs to LA HISTORIA DIVINA DE JESUCRISTO. LIBRO TERCERO

These pages are the abridge translation of some of the sections of that TIRD BOOK. Other shall come around and be uploaded as I translated them myself with the help of Microsoft system. If by any chance you are a brother or sister fond to lend a hand, it will be my pleasure to work together. My email for any contact

info@cristoraul.org

This said, let's go.

SECTION ONE

THE CREATION OF THE LIGHT

MORNING OF THE FIRST DAY

Let's travel directly to the subject star of this Introduction to the Creation of the Universe.

As New Path leading to the True knowledge of the Nature and Constitution of Heavens and Earth, I have chosen the Biblical Genesis as lift-off platform.

Speaking about the origins of our Earth, Genesis says: "Earth was confused and empty".

(The Modern Bibles do not deal this way with the translation of the Original Text. It is understandable. The modern translators (Luther and so on) were caught in the trap of their modern way of thinking, and to avoid this biblical "confusion" they chose to adapt God's Word to the mind of the readers. Here, with no dependency whatsoever to anything or anybody; free from the psycho prejudices of the times and its adaptations, I have preferred to support the original Text:

"In the beginning God created the Heavens and the Earth. The Earth was confused and empty".

This is the Original text as found in the Ancient Greek Texts, by the "fathers" translated under the Omniscient guide of God.

Now, that the Earth has gone through a geologic period characterized by an "empty Crust", this is to say, no oceans, no atmosphere, and so on, it is a fact so natural as clear it is that we are born "naked and crying". I mean, I am not to waste my time or anybody else's time in discussing this point.

Of course, I understand, from the point of view of Classic Geology nobody speaks about "Earth's crust's emptiness" in the style that the author of the Genesis shows here to us. But if we must abide by the criterion of the modern Geohistory it would be crazy to talk about the Earth going through a geological period when Earth's Crust had no oceans, no atmosphere, etc. Turning the Word into an intellectual picture we read that our Earth went through a period of time when her Crust was as empty as the face of the Moon is.

The Moon for example, talking about the Moon, yes, we can say that "the Moon is empty". For many reasons. The most natural, because there are no threes in the Moon, the Moon has no oceans, no air, no birds, Moon's Crust is, simply, "empty".

When the Biblical author says of the Earth that “in the Beginning Earth was empty”, the photo finish He wants to transmit us it is about a supergiant “Moon” called Earth.

Therefore, the stairway of the natural elements that the Genesis invites us to climb, it led us to face our Earth the Day before she became dressed in water, air, lands, polar caps, plants, animals, birds, fishes, and men... In a word, Earth, the Day before all these wonders came to fill her Body, in that Day ZERO she had no Biosphere.

And from this retrospective a man who lived 35 centuries ago asks:

Ladies and gentlemen of the Twenty First Century, playing with a planet as empty as the Moon: how did God create the water, the ice, the air, the lands...? This is to say: wise men of the 21st century, working with that Empty Earth can you tell me how God created oceans, continents, atmosphere, polar caps, kingdoms of plants, birds, fishes, and Man.

No, you don't.

Everybody knows that during millennia this question has been hanging on the intelligence of our people. At this point in the distance between the divine author and the reader of the 21st century the official answer in the mouth of whether masters in divinity or simply theologians is that you aren't got to take as true Scientific Work that what is just a poetical, religious metaphor, mostly based in some kind of weird, mystical hyperbole.

Personally, I do not know how to call a position which denies the possibility of any victory by the affirmation of there being nothing to fight for, this way hiding everybody's failure for the sake of Religion.

Maybe one day I shall find the answer. Meanwhile, the first task of this Introduction is to demonstrate that,

1 : against the malevolence criteria of the Modern Science, God does not lie.

2 : that the geniuses of the Modern and Atomic Ages were considered a lot more intelligent that they all really were.

And here I am, taking you back to the Source:

“In the beginning God created Heavens and Earth.

The Earth was confused and empty, and the Darkness was covering the face of the Abyss,

but God's spirit was walking on the surface of the Waters.

God said: Let there be Light; and there was Light”.

I am asking you:

How many times did you read this piece of Historical Information?

How many times has this History been commented?

How many generations tried to open this Seal and grasp God's secret?

And how many thinkers were honest with themselves enough to accept that the intellectual coefficient of the One who created these Heavens and this Earth it is, in fact, that far off from the human intellectual coefficient as Hell from Heaven!

(Just remember: In this Introduction Time will be always understood in a geologic scale. However, I shall, always, speak about Omnipotence according to the definition of *Potence* to be found in the Manual of Physics. The Beginning is the problem. And the answer has always been in the election of the starting platform).

The Biblical Information leaves us on a specific geologic platform.

More in particular the Bible extends at our feet a certain Geohistorical Age.

If from his Information - *the Earth was empty* - we look around and erase of the surface of the Globe all the classic elements of Nature: atmosphere, continents, oceans, and polar caps: what have we got left?

An empty Earth the day before her Birth?

YES!

It is a Planet of these geologic characteristics with a primary crust lacking any natural element the image that the author of the Genesis places on our tables. And the Big Question comes: how did God manage to create the Biosphere out of an astrophysical Planet as empty as the Moon?

This way of questioning is some kind an ancient way of focusing a subject.

Let's focus the topic from a new perspective. We take God's shoes and ask ourselves the question.

Here I go:

What series of physical processes should we have to unleash, control and direct to create a Biosphere out of that geological platform such as the Genesis draws before our eyes?

Indeed: Seeing is Believing.

In the future we will see with the eyes of our face God in action, and we will marvel contemplating how it does Everything. But the Origin of our Own Universe cannot be seen but with the eyes of the Intelligence. With these eyes we are going to see how God created the Light.

Obviously enough, the recovery of the Memory of the Creation of the Universe as Historical Reality, to which the access has been denied for so long, it must collide with the cosmological systems that to fill the gap the Atheist Intelligence did build up.

Irrelevant the details on the origins of the cosmological systems of the Twentieth Century, to which to give them major virtual veracity the enclosed time was assigned to them in nanoseconds, the entry on stage of the real historical system in the origin of the Universe must knock down the intelligence of the reader.

As for me, feeling free and at pleasure dealing with the Memoirs of my Universe I run the danger of driving this Introduction at a higher speed than the

reader could handle without feeling dizzy. I am confident of being able to overcome this problem.

Let's start.

At the dawn of Genesis's First Day the Earth was empty, naked, without Biosphere. No oceans, no continents, no atmosphere, no polar caps she had. None of the natural elements we love from birth were dressing the nakedness of our Mother Earth.

Seen from the distance Earth was a planet presenting a Moon-face, only much bigger. This is the stage; this is the platform from which we are going to climb the stairs of the natural elements.

We have two realities, the Earth and God. And here the questioning spins around the Question: how departing from that geologic platform God created the Biosphere?

I said that this question we might do to ourselves.

Working with the scientific knowledge we enjoy these days we may set on the table a geophysical sequence good enough to allow us to see HOW GOD taking Mother Earth by the hand led her from that original emptiness stage to her final condition.

It was not easy to do. There were whole pages of equations to take care of. God had to face those questions and give them the perfect answer.

And He did.

The results hit our eyes; no need to go on and on.

The fact is that God solved the problem of the creation of the Biosphere departing from that geologic platform: because He knew the answers. And He knew the answers because He knew all the equalities to those geophysical equations. Perfect connoisseur of these equations and his solutions God got up, rose to the stage, opened his mouth and spelled his Word:

“LET THERE BE LIGHT”

Immediately after, without entering here on “the How”, or under what forces the Earth began to rotate around her axis at higher and higher speed after every turn, this acceleration of the rotation of her Core was the first effect by God created. It was the turning of the key to the engines.

On the long run we will see “the How He created this rotational movement”; by now let's stick to the things that we can more easily understand: the facts.

To advance a little this journey you must understand that Earth's Core is an Astrophysical Body; Earth's Core is a Microstar. A Microstar going down to its collapse once its gravitational field had been transformed into stellar natural forces.

This said, let us hurry up and follow the action.

Consequently, from rotation zero Earth's Core began to rotate around her axis at high speed. This Earth's Core rotational movement was the first step of the geohistorical sequence in the origin of Mother Earth's Biosphere.

Effect of the accelerating rotation of Earth's Core was an earthquake of astronomical proportions.

The Implosion of the Core, equal to the movement right after the turning of the key to the engines of your automobile, created a wave of Heat whose massive power drove the Mantle from its solid stage to the liquid nature, a final stage the Mantle has preserved till our days.

To put into more clear words this action I say that the temperature of the Core was failing; the Earth's Core was reaching the point of a star on its way to the grave. When a star dies the forces maintaining its body together pass away too; the star becomes a rock and if hit by a shooting object flying the free spaces its body breaks into pieces. And as the time goes on and on the dead star turns into dust.

Here from the "confusion" of Mother Earth. She was not just empty, "she was confused". We will see later the origin of her Confusion.

From the point of being buried Mother Earth came to see the Light; and her Light was in the Word of God.

Her Heart began to rise, her pulse began to rise. Her Mantle melted. Her Crust began to warm. And under a symphony of earthquakes and volcanoes her whole Body shone like a star.

The spectacular awakening of Earth's Core, that star sleeping in the heart of her Globe, transformed the Planet's surface into a sea of living lava, a vulcanological process of indescribable power and beauty.

As the warrior who obeys his king, seizes sword and shield and throws himself in the battlefield, roaring with the voice of a lion, and while running goes creating earthquakes under his feet, in a few geologic hours that "empty" Earth was turned into an ocean of living lava.

Tidal waves and gigantic tsunamis of lava were shaken the surface of Earth's Crust.

A show for the sons of God to see; a History for Eternity, a Memory to write on a Book of Gold, our History, our Memory.

This fusion of the Earth's Crust came to happen during the Morning of the First Day of the Creation of our Universe.

How long took the Fusion of Earth's Crust?

Who's the man wise enough to say: "I know the Mathematics of the Science of Creation", "this is the rotation speed given for God to the Core in order to heat the body of the Mantle", "this is the time the Core took to melt the Crust", "this is

the exact numerical difference between the Earth's field density the Day before and the Hour when the Crust began to melt down". So on so forth...

You see, my friend, you may be the most powerful man on Earth, but the lack of intelligence makes of you just another brute on his way to the dust.

Morning was gone; Midday came.

First Day: MIDDAY

The creation of the Atmosphere was resolved as told:

God multiplied the density of the gravitational field of the Earth; the Core of the Earth jumped from a stage close to collapse to the point of astrophysical implosion in the origin of the stars.

Once the rising of the density per astrophysical unit of the gravitational field of the Earth caused the geophysical implosion of the Core the temperature of Earth's Body was raised from a point remarkably close to destruction to the stage of physical existence natural to it from that Day on.

The first effect, globally talking, to notice was a massive earthquake shaking Mantle and Crust. This global earthquake was the answer of the physical structure of the Primary Earth to the acceleration of the rotation of the Core caused by God.

The second effect to notice was the creation of "a Geophysical Chromosphere" between the Core and the Mantle. This Geological Chromosphere existed from the day of the Creation of Earth as a Planet. Every Planet's Core is an Astrophysical Body. Every Astrophysical Body reacts to the same level of Gravity around in different manner, here from the differences among the planets of the Solar System and even between Planets and Moons.

Same thing we must say taking about the nature of the matter floating and moving through the stellar systems. Density is a spectrum no limits. The dark nebulas we observe in the skies say volumes on it. There are clouds of matter whose density are beyond the star power of molecular disintegration. When those massive clouds of interstellar matter coming from the open spaces cosmic fields reach a star, and gather around a certain stellar field, their density is high enough to create a wall around the star. They shut off the star light in. Ergo, the temperature of the star system rises, and keep on rising till the heat accumulated does accelerate the pulse of its body. The star system heat reaches a point of Implosion by which it breaks that wall, this way creating a Nova, or a Supernova.

But it can happen also that the density of the intergalactic matter cloud is beyond the star power of disintegration its mass, and the cloud settle around its Surface. This is the way planets are born in the Universe. Between the Core and the Matter, later to be its Mantles and Crust, a Chromosphere is created, which will encircle the Planet's Core forever.

Observing the final shape of the geophysical body of the Earth we notice the deformity of her Sphere caused by the rotation of the Core, which following the swinging of the Sun provokes the kicking of Earth's Core against the Mantle; by the "Geophysical Chromosphere" this kicking impact is reduced and gives to the Globe its classical shape, the larger radium we see natural to the Equator. The

geophysical chromosphere acts as a pillow between the Mantle and the Core. However, this particularity is a singularity. We shall overcome this effect later.

Now. The third effect to notice –getting back to the Creation of the Light– is the liquation of the region of the Mantle around the chromospherical Core. The beginning of the classical chain of thermonuclear explosions in the origin of the Volcanism had place during this MIDDAY.

The intensity of this first chain of thermonuclear waves caused the Crust to become an ocean of living lava.

We can see the intensity of this geophysical implosion of the Planetary Cores in the rings of the outer planets. While the Implosion of the Astrophysical Core of a Planet is not subjected to a mathematical control, as did happen with the implosion of the outer planet's Cores, the first chains of thermonuclear waves in the origin of their final constitutions shot masses of lava straight up to the other side of their atmospheres, the pieces of lava cooled and became their Rings.

In the case of our Earth, GOD subjected the Implosion of her Core to mathematical control, and this control had the Melting of the Crust as goal.

You may use your imagination and figure out all by yourselves this transformation of the Crust of the Earth into a global ocean of living lava, by simply projecting this Revolutionary Geological Age to the surface of the Moon.

How did God multiply the density of the gravitational field of the Earth? it is not mine or your problem.

I will not enter in the discussion.

The Intelligence of God as Creator of the New Cosmos and the Universe it is beyond imagination.

By the perfect Mathematical Control, He exercised on the Geophysical Implosion in the Origin of the Biosphere, I can infer that His Wisdom makes of all the geniuses century after century denying Heavens and Earth as Creations of God, a bunch of fools. However, it would an evil action to blame my fellow men for being men. You must read the DIVINE HISTORY OF JESUS to understand WHY He sealed the Door to the Knowledge of His Creation.

But let us keep keeping on.

Everybody knows that out of the melting of any solid matter we can produce: “gas and vapor”.

Talking about an entire planet's crust, facts oblige and put us in front of the birth of Earth's Atmosphere.

In this case “a rarefied atmosphere”, outer planets type, and non-apt for the support of living things. However, without enter in this moment in the subject, an Atmosphere that we can call “Primary Atmosphere”.

This Primary Atmosphere was the final effect of the Melting of Earth's Crust.

The numbers and the chemical composition attached to its volume are points to leave behind now; I will be back to them when the time comes to enter in “the Confusion Room”.

FIRST DAY : EVENING

The Picture of that Morning could it be more exciting? Those who were so lucky to see God in Action they were mouth and eyes wide open. That the Power and the Intelligence of the Creator know no limits, they could now “by experience” see. No creature had seen before God in Action. Our Earth and Heavens was the First Act of this Show by God open to all publics. And to which we have been invited by His Son, as we all remember and read in His Gospel.

So, as the volume of Earth’s gravitational field, by God raised, it was related to the Melting of the Crust, once transformed Gravity into Heat, the Core began cooling. When this process came to an end, the Primary Atmosphere felt this falling of the Mantle Temperature and began to fall too.

Yet, this time the Core would not fall down to the state of collapse wherein God rescue it out from.

However, once transformation of gravity into heat was begun, Earth’s Core cooling down was in the air.

God had mathematized from the very Dawn of the First Day the Time and the Forces needed to produce the Primary Atmosphere. As a matter of fact, this is why the Author speaks of Days: to giving us idea of the Control by God held during and through every process in the Making of the Biosphere. As the Day is ruled by the Hour, so God ruled the making of the Biosphere by the Minute, leaving at the Hazard not a single molecule, so to speak.

That the Core, once the fusion of the Crust came to an end, had to sink into a low rotation stage equal to the density of the gravitational field once was the Making of the Primary Atmosphere done, this we can deduce it all by ourselves.

In a poetic way we can compare this new stage of equilibrium between Earth’s Core and Earth’s gravitational field to the polar bear who fall asleep to let the winter season goes.

There are here lot of things to say, but a will stick to the facts.

The first effect, after the creation of the Primary Atmosphere, was the solidification of the Crust, that we will call from now on “the Secondary Crust”.

The cooling down of Earth’s Core brought upon the scene the contrary chain of facts already noticed. The first part of the geophysical body to feel the cooling down of the Core was the Crust.

Then the Mantle.

Finally, Earth' Core...

During the first hours of this Midday of Genesis' First Day the Primary Atmosphere became some kind of planetary nebula. Subjected to high stormy conditions electrical thunders, caused by a thousand of volcanoes, the electrical energy was chemically transforming its chemical composition.

This Midday was a show of sound and colors not to forget. In the Hours after came the quietness, the stillness, and the Sublimation of the Primary Atmosphere began.

Sublimation of gas is the physical process by which a gas turns into solid matter. The creation of the Light, as you may be imagining at this very moment, came to happen.

The existence of all astrophysical bodies in the universe depends on the running time they had to transform their fields of gravity into natural forces, be electromagnetic fields, photonic matter, or heat.

Nothing lasts forever. Energy and Matter are ruled by Law. Universes come and go due to this Law of transformation of Gravity into Natural Astrophysical Forces. Once the tank is empty the engines die. Stars die, the Universe collapses.

This Law is Universal. This Law rules everything in the Cosmos. Nothing lasts forever. Galaxies come and go. Stellar systems have their existence ruled by this Law. Gravity is the fuel; stars are the engines. Transformation of Universal Energy into Physical Forces by Astrophysical Matter is on the run.

Nothing escapes to this Law.

Only God has the Power to intervene in this Dimension and do as He pleases.

In the case we are dealing with, the production of Heat by Earth's Core, having in Mind a certain Primary Atmosphere, once He got it, God left the process follow its path.

The process of transformation of gravity into Heat, once it was finished, it gave way to the cooling down of Earth's Core.

The Core's cooling down decreased the power of the chains of thermonuclear reactions in the root of the Melting of the Mantle.

Mantle's solidification became hour after hour a fact. And with it, between the Core and the Crust the Mantle became a Wall shutting the flow of Heat from the Core to the Crust.

The Solidification of Earth's Crust was on the run. Once done, the source of Heat from the Core to the Primary Atmosphere was put off. This done, the Sublimation of the Primary Atmosphere became a fact.

As the level of Earth's Energy was shorter and shorter with the Hour the fall of the Temperature of the Her Outer body touched Absolute Zero. And because it, the Sublimation of the entire Primary Atmosphere became real. The entire

Atmosphere turned into a RING OF ICE encircling in its body the body of the Earth.

This RING OF ICE was the LIGHT.

Another day I will touch some points left beside for the sake of the better understanding of the Action by GOD put in motion.

SECTION TWO

CREATION OF THE FIRMAMENT OF HEAVENS

CONFUSION OF THE EARTH

We call her “Mother Earth”. With her History we are dealing.

Given the surprise on the discovery of this sequence of Geohistorical Events where the geniuses of the Atheist Modern World and their playground, the Atomic Age, judged there was nothing, except the product of a feverish and fanatical imagination working under religious compulsions, sequence perfectly scientific in his exposition and development, facing the Dawn of this Second Day I consider good to summarize the general vision until already developed in the first section:

DAY FIRST

1: Elevation of the density per astrophysical cubic unit of Earth’s gravitational field.

2: Acceleration of the revolutions of Earth’s Core around its axis. Result, the astrophysical implosion of Earth’s Astrophysical Core in the origin of the heat of the Planet.

3: Thermodynamic elevation of the Inner Geophysical Globe, which from the Mantle spread up to the surface and cause the fusion of Earth’s Primary Crust.

4: Fusion of the Primary Crust under the effects of the first series of thermonuclear waves through which the Mantle went, and production of the Proto-Atmosphere. (The chemical composition of this Proto-Atmosphere, sui generis among those of Earth’s planetary family, creates us an alternative problem, which I will not touch in this place but on which I will return in another moment).

5: While going on the transformation of her gravitational field into heat, Earth experienced the natural consequences due to the deceleration of the revolutions of work of her astrophysical Core; the fall of the speed of rotation of the Planet and the descent of her body temperature were the visible effects.

6: These last effects were cause of a new sequence of events; the main being: the cooling of the external surface of the Globe, ipso facto putting the first stone for the creation of the outer geophysical ring, the Lithosphere.

7: Birth of the Secondary Crust. The Lithosphere is the external layer of the Crust.

8: Cooling down of Earth's Mantle. The geonuclear waves, until then going on, began to vanish.

9: The cooling of Earth's Mantle became a wall stopping the Core's heat from reaching the Proto-Atmosphere.

10: Once the Proto-Atmosphere was thermodynamically isolated its temperature fell at vertiginous speed till its volume froze. Its result was the transformation of the Proto-Atmosphere in the Ring of Ice at the end of the evening of that First Day reigning supreme from pole north to pole south. As I said earlier, this Ring of Ice is "THE LIGHT" in Genesis' First Day.

This is the sequence that we have covered cheerfully in the first section. I left specific facts in the air. It is time to dive a little big deeper.

God subjected Earth's body to the law governing the behavior of the Universe: the transformation of the gravitational energy in Physical Forces: light heat, radiation, electromagnetic field... It is upon this Law that God has founded the Body of our Heavens.

This settled, the application of the Universal Law governing the Physics of Heavens to Earth's system leads us to play with the series of reactions that different astrophysical bodies, with diverse properties, can put in motion under the same external factor, as it could be the entry into a stellar system of a certain flood of energy, type gravitational string.

Playing with the Universal Law already on the table, connecting the temperature of a stellar system with the going up and down of its gravitational fields, if its gravitational field is found on the edge of collapsing, we can figure out the reaction of its stars under the flooding of a gravitational stream breaking through the cluster frontiers.

I speak about the natural creation of Nova and Supernova. The case I spoke before mentioning a Nebula belongs to a different scenario. The question here is this: What would happen if a binary or multiple stellar system was subjected to a sudden out-of-control raising of the density of its gravitational field?

Its antagonistic question would be: what happen with an astrophysical system when the transformation of the gravitational field is completed?

But let us get back to the road our Creator had extended before us.

On mind the state of the Earth at the end of the First Day, wrapped up her Geophysical Globe beneath that Ring of Ice by our Creator called “THE LIGHT”, from the seat of those sons of God who had contemplated the entire Action: the vision of our Planet was that of an immense “Ball of Ice”, floating out there in the Abyss, a massive “cosmic egg” born in the Darkness.

The next sequence of events that God had in mind was the following:

I : Moving the Earth from her region of origin to her final place in Heavens.

(This location of the region of origin of our Earth will be a question to solve in a chapter to come. The need to prepare you to fight back the factor of incredulity that the location will wake up in your mind suggests me this advance. However, I will elegantly face the challenge).

II : Entry of the Earth in the Solar System.

III : Sublimation of the ICE RING.

(By sublimation of the ICE RING it is understood the jumping of matter from the solid state to the gaseous state without paying toll to the liquid state. In this case it would be the inverse process of the sublimation of the gases. If in the previous Day we saw how God managed to lower the temperature of the Globe down to the critical point of sublimation of her Proto-Atmosphere, on this new Day we face the opposite process).

IV : Rupture of the Ring of Ice in two blocks, and retreat of those two blocks towards the geographical poles.

(This retreat of the two ice blocks towards the polar caps is a historical reality by the classical geology testified. I remember here that Science is the ABC of the Language of the Creation. However, trying to shape the Universe and his History according to “the omnipotence of the human Reason” it is an exercise of vanity in which I am not going to say anything now. Science, as Theology, they have been subjected, up to this day, to the effects imposed on the Nations by the Fall of Man. It is not for us to analyze the theories and the intellectual states for which both Faith and Reason (Science and Theology) have gone through. Who, in Adam’s boots, would have skipped falling?).

AND V: Birth of the Mother Ocean and Formation of the Prehistoric-Atmosphere. (This Atmosphere is the Firmament in the Verb of the Second Day).

Let’s get now to business.

MORNING OF SECOND DAY

For the sake of a better understanding of the narrative I should stop the course of God's Action. it might do some good for the sake of the general vision.

As we have imagined all by ourselves the Act of the Creation of a Universe have to Branches: Science and Art. Science is the basis, Art is the final manifestation. If Science is Power, Art is Passion. Put both together, and you have the picture of the One who was making our Universe out of the ashes of the Ancient Universe. But I think am getting too scrupulous about it. Let's get back to the Text.

The Text does not lie. On the Fourth Day of the Genesis it is said that "God created the stars to separate Light from Darkness". I quote:

"God created the two big luminaries,
the biggest to preside the day,
and the minor to preside the night,
and the stars;
and He put the stars in the Firmament of Heavens to light Earth.
and to preside the day and the night,
and to separate Light from Darkness".

Who has not read this text? I repeat:

"God created the stars
and it put them in the Firmament of the heavens
to separate Light from Darkness".

The Author says that God created the Light and, as soon as the Light was created, He separated it from the Darkness.

Very well, God created the Light, then it separated it from the Darkness, and created the stars to separate the Light of the Darkness. The question is: what would happen now if where the Author wrote Light, we write "the Ring of Ice" which we have seen being created out of the Sublimation of the Proto-Atmosphere?

It is just a matter of Logic that if God created the Light and separated the Light from the Darkness, and then He created the stars in the middle, between the Light and the Darkness, to keep Light and Darkness separated from each other, then: Does this mean that God created the Light somewhere on the other side of the Vault of the Stars?

THE PHENOMENOLOGICAL PHENOMENON

From a very natural point of view, seen that the Atmosphere of Mars, at a greater distance than Earth's FROM the Sun, has kept the original gaseous state, two plus two on the table, we got to conclude that the Sublimation of Earth's Proto-Atmosphere under the Solar System's parameters it would have been an impossible fact. More, if colder is Mars's Atmosphere than Earth's, still much colder is Jupiter's, and, as we see, this fall of Jupiter's temperature did not lead its Atmosphere to the Sublimation Process through which entered the Earth's.

THE CRADLE OF EARTH'S ATMOSPHERE

Now let us take pencil and paper and throw lines.

The Author of the Divine Text says that God created the Light,

*“and God separated the Light from the Darkness,
and created the stars to separate Light from Darkness”.*

Accordingly, we draw three areas in the paper.

In the upper part of the paper, we place THE LIGHT, this is to say: THE EARTH.

In the bottom part of the paper, we place the DARKNESS.

And in the middle area, separating both, Light and Darkness, we place the VAULT OF HEAVENS: the stars.

No need to be a genius to understand what this means; all you need to know it is what “the Light was”.

Having already crossed the Door of Light the Divine Picture come to this:

God created THE LIGTH somewhere on the other side of the VAULT OF HEAVENS.

Once the “Ring of Ice” (THE LIGHT) was created, God moved the Earth from that Region to the Solar System, creating the Star as a Wall of Separation between Earth and her Original lieu of Origin.

God said, “Let there be light,” and there was light. God saw that the light was good, and ...

He created the stars to separate the light from the darkness.

This is to say, GOD created the EART in the DARKNESS, and, once the ICE RING was created, He separated the EARTH from the DARKNESS and created the STARS to separate the EARTH from that DARKNESS place where EARTH was created.

Ergo: The Earth was not in the Solar System when the Creation of her ICE RING was taking place.

We will see what this means somewhere ahead.

Use the Key: where you read “the Light” you write the “Ice Ring called the Light”.

Where we read “the Light” you write “the Earth”.

And the new reading tells so:

God created the Earth in the Darkness - wherever this Region is it is not of our concern now...

.... once He created the Ice Ring, THE LIGHT, God separated the Earth from the Darkness, her place of Origin. He then placed the Earth around the Sun, creating the Vault of the Stars to separate the Earth from the Darkness.

This is the New Reading of the Information passed on to us by the Divine Author.

No matter how sensational may sound in your brain this disclosing of a Secret for 3.500 years kept under an All-Powerful Seal, the succession of events determined by the Creation of Earth in an Outer Stellar Area gives credit to this New reading.

As we see all around, if the Earth had been created straight in her third orbit around the Sun the Existence of Ice on her surface would have never been possible. The absolute absence of any Ice Ring on the surface of Mars, while equal the Process of Creation for both planets, it states all by itself the Cause of the Phenomenological Phenomenon already pointed out.

If created the Earth straight in the Stellar Vault, this is to say, in between Venus and Mars, her original Atmosphere would had never gone beyond the nature of the Atmospheres classical to her entire planetary family.

On the other hand, the Creation of the Ice Ring in a region subjected to the Zero Absolute not only would have been possible but accelerated the process to its utmost speed.

To this expression we call OMNIPOTENCE, where “Potence” is equal to the “potence” in the classical physics equation.

Potence is the capability of a Force to realize a work in the minimum quantity of time. According to this Law: God subjected the Proto-Atmosphere of the Earth to the conditions of Zero Absolute already spoken. He created these two effects: On one hand, the reduction of the Process of Sublimation of the Proto-Atmosphere to its minimum expression of Time; and on the other hand, the

quality of the Ice created by Sublimation. On this Quality the Existence of Polar Caps after so many Geological Ages speaks volumes. The fact that the Atomic Age has accelerated the natural conversion of the Ice into Water it cuts not a piece of the Main Fact, the Creation of the ICE RING under optimal physical conditions.

Of course, I am aware of it, this picture leads us to the Creation of the Earth, a topic to be touched later on. I said before that I will stick to the Text as the Path to lead us toward the True Vision of the whole History of the Creation of the Universe, which is very much related to the History of Humankind. As the Genesis's Text take the lead from the Earth already created there is no need to look back, but to look ahead, which is what we are doing, and for the sake of our souls we will keep on doing till the moment comes.

THE VAULTS OF THE STARS OF HEAVENS

The 3.500 years old Author inform us about the astronomical distance that God put between the Darkness and the Light, when "Light" is equal to "Earth" and "stars" to the "Vault of Heavens".

It gives us neither numbers nor intergalactic coordinates.

He says to us that God created the Earth, and between the Earth (Light) and his Original region (the Darkness) God raised the stars of Heavens.

Wonderful and revolutionary translation that places us just where our Creator wants to see us: In the Darkness and looking at Heavens.

We will have time to take a closer look to the Cosmological Region where God created the Earth. By now let us summarize the acts comprised in this Second Day:

1.- God defrosts the Ice Ring by nearing the Earth to the Sun.

2.- The Sublimation of Earth's Ice mantle by this "getting closer to the Sun", reduced the time of defrosting from numberless millennia to the minimal expression by the physical laws allowed.

3.- Out of it: The Secondary Atmosphere is born.

4.- The Earth begins her voyage to her Third Orbit. Consequently, the Sublimation Process slow down, till at last the Ice begin to melt into water. This is the Origin of the Mother Ocean, out of which womb later will be born the seas.

5.- By nearing Earth to Sun, God had reactivated the Geophysical Core of Mather Earth.

Let's stick to this fact.

IN GOD'S SHOES AGAIN.

Obviously, we can't take the Earth a little closer to the Sun, to see the reaction of her Core. And backwards.

Imagine, just imagine, that we could. Counting on His Blessing we put on God's shoes and we move Earth at a distance from the Sun equal to the orbit of Venus. Then, we keep on playing and move her backward as far as the orbit of Mars.

Logic says that if we could, closer to the Sun will imply a rising of Earth's Core pulse and consequently the raising of the temperature of her Geophysical body; and moving Earth as far as Mars will magnify the fall of her thermo-geological parameters.

Still further, moving on Earth to the orbit of Mercury the Earth's Crust would explode; and backwards, reaching the orbit of Pluto, Earth's Crust would collapse.

Imagine Earth's Core stopping transforming Gravity into heat. Logic says that as natural reaction to solidification of the Magmatic Ring between the Core and the Crust, the Lithosphere would collapse.

Imagine now the relation between Matter and Energy based on a process of mutual interactivity. This is to say, the existence of an astrophysical body, whether a sun, a planet, a moon, based on an interactivity relation. Stellar Matter cut off from interactivity with a universal gravity field would become a débris.

Projecting this fact to the body of the Earth we say that if.... Earth was disconnected from interactivity with the Sun she simply would be exposed to the forces coming from the outer space. Earth with a dead Core would become a wall without cement between the bricks; any force would alter its constitution, and finally the wall would be no more.

As a matter of fact, this is the situation endured by the Earth, according to Genesis, after her Creation. The Divine Author says: "Earth was confused".

"EARTH WAS CONFUSED".

Why? Let's look at the why Mother Earth was confused.

Imagine that you have been created to perform a certain event. Better example than Moses himself cannot come to our help.

There he was the man, born to liberate his nation from the yoke of the empire. He is young, he is wild, he is strong, he can't wait, he kills a man, and he is ready to blow the horn of war of liberation. He was forty years old. Now he is eighty years old. He is a simple shepherd from the desert. Where it is then that promise of becoming the liberator of his nation? Why he killed that man? Was that his story, the life and dead of a killer? Where was now the God that inspired

his youth with promises of national freedom? He was eighty years old, what was God waiting for? Was it all in all just a youth's illusion? He was young and strong back then...; now ... he is an old man, a poor shepherd from the desert of the Sinai. Where was his heart now? He has sold gold for tin. That was the end? Saved from the murder hand of a tyrant to die like a soul lost for himself and the world?

And so Moses walked, alone and confused, under the sun of the last of the kings of the Hyksos Dynasty.

What "Confusion" could Earth had gone through in the early days of her creation?

The promise of her Creator to become the Mother of a son of God was shining like a sun in her heart. What then had occurred between the Hour of her Creation and the Day of the Creation of the Light, for the Writer to say: "*Earth was empty and confused*".

Empty she was. We have seen How God created the Light, how her Creator dressed her in White, to meet her Bridegroom, the Sun. Before she was empty. She could not dress herself. She needed her Creator to be dressed. The Process of the Fusion of her Crust was beyond her Power. Where was her Creator? Had she killed somebody and was hiding there in the Darkness, like Moses in the desert from the Pharaoh? What was her reason to be confused?

To recreate Mother Earth's confusion, we got to stick to logic.

Just as Moses in his eighty years old, Mother Earth was dying. This is to say, soon her body would fall in the state of the Wall without cement between the bricks. Coming from the outer space any shooting object falling on her body would be a cannon ball against a wall. After a number of punches, she would become another débris flying the immensity of the infinite spaces. This would happen to her once her Core lost power to link to any energy field. This heartbreaking scenario would mean her Destruction.

During the DAY ZERO Earth's Core was living upon its own field. The constant flowing of energy linking hundreds of stellar systems with the Universal Source was missing.

Earth was confused, this is to say: "Earth was alone".

This New Reading takes us a level higher.

God created the Earth in the Darkness, at the other side of the Vault of the Constellational World. We do not know yet where this Region is to be localized in the Cosmos. But it is a fact that after the Creation of the RING OF ICE He separated the Light from the Darkness, which means that the Earth was on the other side of Heavens during the entire the First Day of the Genesis. Ergo: He created the Earth beyond the Vault of the stars of our Heavens; then He created the Light, and only after the Ring of Ice was created, He brought Earth into Heavens.

The conclusion cannot be most obvious:

"God left alone the Earth in Heavens' Outer Cosmic Space during the time running between her Creation as an Astrophysical Body and the Morning of the First Day of the Genesis.

There, exposed to a Zero Absolute Thermic Zone, unlinked from any Universal Source of Energy her survival as astrophysical body depended exclusively on her Gravitational Field.

Exposure to a Zero Absolute Thermic Zone and disconnection from any Source of Energy from the Cosmos around makes any astrophysical object a body sentenced to destruction. In this situation room a gravitational Field becomes a black hole attracting toward its surface masses of cosmological débris floating along. The power of all Astrophysical Core is related to the creation of the cement connecting brick to brick and keep the wall intact. However, depending on her system alone, the transformation of her gravitational field into Natural Forces means a constant disintegration of its volume. And such a situation cannot be kept going on forever and ever. Soon or later the “gravitational tank” touches the FLAT LINE, the “Astrophysical Transformer” begins to sink. From this moment the production of forces to maintain the parts of its Body together come to an end, and the shooting forces coming from the outer space would do their work.

Left alone to live this scenario: Earth had “reasons” to be “confused”.

1 : At the time when her Creator came back to her, her Core was dying.

2 : Until then Earth’s Electromagnetic Shield was absorbing the impacts from the outer space matter by absorbing their mass in her body. The danger of implosion by accumulation of mass on her Crust was also on the air.

3 : Once the deactivation of the Core done, a single giant mass coming from anywhere could hit her body and demolish its configuration in a second.

And where was God, her Creator?

To answer with wisdom let’s say that God was on His way.

The Creation of a Universe is a symphony by many great musicians played. You got to gather and keep them together. The same God who created Moses and made him wait, and without Him he could do nothing, that same God made the Pharaoh on which ruin His Name was to be exported to the entire World, Christ in between.

So, when we read “the Earth was empty”, in this emptiness we got to read also “Earth was alone”. As the loneliness of Moses was the root of his confusion, so the Earth was confused because she was left alone “in the Darkness”.

Now, to picture out the entire scene from the creation of the Earth to her entrance in the Kingdom of the Sun, the Dawn of the Second Day breaking, we say this:

God created the Solar System at the other side of the Vault of Heavens. Once created the entire Solar Family, God took the family of the Sun into the Heavens, but He left behind, alone, “in the Darkness of the Abyss”, the Earth.

This Motion, forward and backward, was perfectly timed by God. The nature of Earth’s Biosphere as well as the physical conditions under which the Ice Ring has been created has allowed her Geophysical Body to make its Path through the Ages under a thermal stability.

The temperature under which a certain mass of Ice is produced puts on the table the amount of time it will maintain its solid nature. Created under Zero Absolute Temperature, the Ice Ring, Source of the Polar Caps, has maintained the Temperature of the Ecosphere according to the changes of the Ages.

True it is that the Atomic Age has caused instability contrary to Nature. Yet, no one must forget that the Atomic Age is just a hill among the Mountain Ranges by the Geological Eras written in the Book of the History of the Earth.

This said let us set our eyes in the Second Day. We read: And God said:

“Let there be a Firmament between the waters, to separate water from water”.

SECOND ACTIVATION OF EARTH’S CORE

Imagine Sun as a wall, and Earth as a ball of ice. You shoot the ice ball against the wall, the ball of ice breaks. A plastic ball will hit the wall and will come back to your hand; a ball of ice will not come back to your hand.

Following this picture, we ask ourselves:

How long would take to the Sun to melt Earth’s ICE RING if she was shot against Sun’s surface just as we throw a ball against a wall?

This is what God did.

Logic says that having been already placed the Planets in their orbits the only way God had to place Earth into her Third Orbit was by making Earth to draw a parable in the Sun’s sky.

Doing this He had in mind two events:

1 : Reactivation of Earth’s Core,

2 : Defrosting of Earth’s Ice Shield at the maximum speed limit, equal to the Point of Sublimation.

Ergo God was not interested in showing His tittle of champion of the world. Life was the Horizon. The Tree of Life was the Target. The rest you can picture out yourself.

Earth “hitting the wall” means here time for orbiting around Sun’s North Polar Magnetic Field. During this circling around the North Polar Magnetic Field, Earth’s Mantle of Ice reached the Sublimation Point. This on one hand.

On the other, the conclusion of this Melting or defrosting of the Ice Ring would be the creation of the two Geophysical Polar Caps. Let us deal with it.

CREATION OF THE PRIMARY ATMOSPHERE, AND THE OCEAN MOTHER

As I said the placing of Earth into the Solar System was equal to the throwing of a ball against a wall, but the effect was not exactly the one expected from the meeting among wall and ball. Considerations of Physics come to the stage.

God’s idea at hand was the acceleration of the Sublimation of the Ice Ring to the maximum speed allowed by the laws, without causing a break-up of the Geophysical Rings composing the Body of the Earth.

The rotation at great speed of the Earth around the polar arm of the Sun’s magnetosphere caused the looked-for sublimation by God intended, on one hand, and, on the other hand, it caused the reactivation of the Core of the Earth, with the natural expansion of the geophysical body understood.

If we compare the Ice Ring to a big block of ice, we can translate the effect of this reactivation of the Earth’s Core on the mass of the Ice Ring as the fall of a hammer on it, but in this case from the inside of the Ring. The reactivation of the Core implied the production of heat at a high level by the increasing of the transformation of gravity into electromagnetic forces.

As the local physics puts it, the heating of any solid matter carries on an expansion of its radius. This way, using this sudden reactivation of Earth’s Core, equal in many ways to an astrophysical implosion, God brought to His Hand the Hammer with which the ice man breaks up the ice block.

From these two effects, the exposure of the Ice Ring to a Distance from the Sun equal to the High Sublimation Point required for transforming millennia into days, and the breaking up in pieces of the Ice Ring by the sudden rising of the Crust upon a Mantle subjected to a high intensity of geonuclear explosions, the final results were:

“THE FIRMAMENT BETWEEN THE WATERS ABOVE
AND THE WATERS BELOW THE FIRMAMENT”

Ergo: EARTH’S ATMOSPHERE THE FIRMAMENT is the Firmament
between the waters above the Firmament
and the waters below the firmament”,

and the Waters below the Firmament is the OCEAN MOTHER of the seas and oceans to become to existence the day after.

When the Second Day came to an end the natural vision of the Earth was the picture of a Planet with its own rarified atmosphere, or Primary Atmosphere, and under this “Firmament” the Ocean Mother between the Two Blocks of Ice, both in continual process of defrosting.

The question that now follows spins around why the Sun did not swallow the Earth. The effect of the ball against the wall was produced, why instead of swallowing it, the ball the wall rejected?

Earth could not be placed in her historical orbit following a bowling trajectory because the Planets were already in their orbits. From the outer Solar System to her place the parable was the only way left to her. As I said God could have placed the earth straight on her orbit avoiding a face-to-face Earth-Sun. The reason why He did not do it it's been already stated.

Omnipotence is equal to the Power of reducing the result of the equation Force-Space to its minimal expression of Time. Understood that a confrontation Earth-Face no subjected to Science would lead the reactivation of the Core to an Implosion type Nova, God had to project the Earth as a kind of shooting star to be trapped by the Solar Electromagnetic Field, rejected back in response to the equality of the Electrical Forces.

We may follow the process.

The way for a shooting star not being swallowed by a sun rests in its speed. Two forces of equal electric sign cause an acceleration of the speed of the minor mass before being rejected.

This being the case: As Earth began to link to Sun's Gravitational Field her Core began to increase its activity, and by this increasing her magnetic field got stronger. These two effects, the electrical rejection and the magnetic absorption, made the Earth, on one hand, to spin around the solar field, and, on the other hand, to be pushed away from the Sun and straight toward her Third Orbit.

To frame the picture, this Second Day ended when the Earth took her place in her forever third orbit and her Body was dressed with two Polar Blocks, and in between both the Ocean Mother.

Ever since those Two Original Blocks of Ice have been moving on from the Tropics to the actual Polar Stations.

Back to the Lecture from God to His sons, we understand that the entire Edifice of the Universe is based on the electrical natures of the Astrophysical Cores. The reaction of the Earth to her approaching to the Sun settled this Nature on the table.

So, if on the First Day God settled on the common table of study the relation between the Astrophysical Matter and the Universal Gravitational Field, in this second day God defined with this example the Forces between the Astrophysical bodies themselves.

Given that the source of all the stars and bodies of the universe is the Microcosms and in here the electrical nature of the bodies define the existence of the matter, this Cosmic Nature is preserved during the jumping from the Microcosm to the Macrocosm, to keep ruling the existence of the macro-systems by the same Forces.

The Planets cannot, never ever, touch the Sun due to the equality of their Electrical Fields. The law determining the positions of the masses into a gravitational field activated by a central transformer is a response to be calculated between their respective Electromagnetic Field Nature. Once the equations have been resolved the Electromagnetic Fields act as a Network with mechanical arms grasping the masses one to another. If this Nature were not active after the jumping from the Microcosm to the Macrocosm no system could ever reached or keep stability. This is to say, the equation of Newton, on which is based the Relativity World, is no good.

The Nature of the Universal Gravity Field is nothing to do with a black hole science-fiction movie. The Gravitational Field is the platform upon which is build the systems of the universe. The Link between the Macrocosms and the Gravity once operated it enforces the astrophysical bodies to get together or to get apart according to the nature of their electrical forces, and this is why the Cosmos is not falling into one single final mass, as the relativity predicted, because as a matter of fact, its foundation, the Newtonian frame of the universe, is not real.

But there is a second lesson God gave His sons when Earth and Moon came together. If the relation of all the bodies of the cosmos with the Universal Field of Gravity is based on the Transformation of Gravity into Electromagnetics Forces, this relation, while being universal, brings forth different equations. This is to say, Astrophysical Matter has not a universal density, but it varies from body to body.

We mean with this that when you put a piece of wood and a piece of metal into the fire, when this fire is equal to itself, the reaction of the two pieces are absolutely different.

We see how different moons and planets respond to the density of the Sun's Gravitational Field. That the density per astrophysical unit is the same all over the Sun's Field we deduce it from the maintenance of a Ring of Solid Matter on its borders.

The local reaction of every single astrophysical body to an Outer Gravity Field will depend, then, on the density of the Core of the Planet, Moon or Star.

From the level of response of the different bodies of the Solar System to the Common Gravitational Field we can say that the Moon is one of the densest Astrophysical Core in the System, while some moons of the outer planets are of very low density, and according to their response they are, though far away from the Sun, in a continuous state of magmatic activity.

This confrontation settled in the table, the lecture from God to His sons cannot be more direct and perfect. If the Cores of the astrophysical bodies were all of the same nature the existence of moons in the far away horizon in constant state of volcanism would be impossible.

The Sun, being another astrophysical body, though by its mass occupying the central position, the Sun is linked to the Heavens Universal Gravitational

Field, just in the same way that the Planets and the Moon are linked to the Sun's. And all of them depend on the transformation of Gravity into electromagnetic energy and matter to exist and keep their existence.

The Gravity Field is the Ocean of Energy from whose Volume the Members of the Solar System fill their tanks with the energy need to keep them alive. And while some bodies respond in a very active way to the Density of this Field, others respond in a very low level, because the density of their Cores is higher. This is the case of the Moon.

The deadly face of the Moon comes not from a dead Core, but from a Core of high density which requires a Gravity Field of a higher density to be activated.

Anyway, we will touch this subject during the Fourth Day of the Genesis; it will be better to stick to the road by our Creator and God traced before us. We run the risk to lose the thread and find ourselves at the Minotaur's mercy. And we don't want this.

The picture for us is clear and firm: God is not a wizard; the Creation is a Science.

Omnipotence is not a kind of magic but the mastery of the Laws ruling the relations between Matter, Space, Time and Energy.

Our Earth comes not from the belly of a sacred cow but from the cradle of a complex number of equations.

Until now we have been dealing with processes, without entering in their details. The Word of God is a Door to a book of Sciences beyond our imagination but open to an intelligence equal to the sum of all the intelligences of all men, to form One Intelligence at the Image of God's, our Creator.

Getting back to our path, we see that as with "the Light" so with "The Firmament".

We found THE LIGHT to be the ICE RING created from the Fusion of the Crust and the Sublimation of the Proto-Atmosphere that came out. There is no point in remembering HOW GOD cause that Fusion. Or maybe there is a point. You can always pull back yourself to the former sections.

From the beginning God knew what He was looking for. It was a struggle with matter, space, time and energy. Knowledge was His ace. He Had the Four Aces in His hand.

A fool, seeing Earth "empty and confused", could have thought that "God wouldn't make it".

THE FIRMAMENT OF HEAVENS

We see that the God's lessons are a treasure of Intelligence, which as much as takes us back to the Origins of our Universe, it does confront us with the fact of His choosing a man from 3.500 years ago to frame the Door for us to cross.

Wisdom comes hand by hand with Intelligence to cause our admiration. But how could be other way? How could anybody has conceived the idea of turning the page and leave God behind as a myth for fools?

But enough of my admiration, let us follow the action step by step, for every day brings its own wonder.

Intelligence tells us that having been all the members of the planetary family of Earth gone through a same birth, the correspondent atmospheres produced from the fusion of their respective crusts and mantles would had have the same chemical nature. When the fusion was finished, the process of cooling down should had bring on scene a common Atmosphere, with some variants in their chemical compositions, but not so much as to have every planet an atmosphere of its own.

Let's say that if we all cross the same river, we all be wet by the same water. Probably an Atheist will tell us that this is impossible because the same water does not run twice the same spot, and so on. No wonder Philosophy was doomed to failure; from the moment the rich class courted her, she was dead.

Anyway, every single step God takes is the fruit of Reason. Of course, as in God's Memoirs I said, the fact of His creating the Solar System beyond the Vault of Heavens relates to events long before the Creation of Man blowing in the air. We will come back to this subject sometime after.

The case is the following: The exposure of the Earth to a longer period in that region of the Space where Hydrogen is abundant would enrich her proto-Atmosphere with the element primordial and necessary to the Sublimation of its volume into Solid Water.

The immediate transportation of the Solar System from its region of Creation into the Vaults of our Heavens meant the production of a Singular Planetary Atmosphere.

Earth no exposure to that short period the other members of her family were, came to be the Cause of the Phenomenological Phenomenon that the Atmosphere of the Earth is in the heart of her family. Had Earth been moved on at the same time than her planetary family into the Heavens her proto-Atmosphere would have never been capable of sustaining Life.

Not in vain calls God the Biological Atmosphere in progress:

“The Firmament of Heavens”.

This is equal to say that Life in our HEAVENS exists only on Earth because God had created but one Earth.

God have created before another Worlds in the realm of His Universe. Talking about Earth, all that we can say it is that when Earth was created, she was the first Planet-World in Our Heavens, and accordingly He speaks about it as “the Firmament of Heavens”.

Let there be Stars in *the Firmament of Heavens* to separate the day from the night, and let them serve as signs to mark sacred times, and days and years, and let them be lights in *the Firmament of Heavens* to give light on the earth.”

And it was so. God made two great lights—the greater light to govern the day and the lesser light to govern the night. He also made the stars. God set them in *the Firmament of Heavens* to give light on the earth, to govern the day and the night, and to separate light from darkness. And God saw that it was good. And there was evening, and there was morning—the fourth day.

I import the Divine Text just to accommodate Truth to Reality. Modern translators of the Book of God translated the Text to fit the brain of all kind of men; incapable the translators to cross the Door of Genesis but motivated by the same Pride of the Modern Mind, they thought *profitable* to debase the Word of the Author than to raising the intelligence of the readers. Even so, the Text doesn't lie. There is only one Firmament of heavens, this is, the Bio-Atmosphere of the Earth.

Resuming:

A: Fusion of the Earth's Crust

B: Solidification of the Primary Crust

C: Sublimation of the proto-Atmosphere.

E: The Ring of Ice, “the Light”, was created at temperature Zero Absolute.

F: God moves on the Earth from the Abyss covered by the Darkness to this Ocean of Stars called “the Heavens” and into the Solar System.

G: Exposure of the Earth to the Sun's Polar Magnetosphere.

H: Sublimation of the surface of the ICE RING.

G: Reactivation of the Core of the Earth.

I: The Ring of Ice is hammered by the Intense Volcanism.

J: Earth reached her Third Orbit.

K: Creation of the Two Blocks of Ice

L: In between both Blocks, God created the Ocean Mother.

M: The Primary Atmosphere was created.

N: This Atmosphere is the FIRMAMENT between the waters beneath the Firmament of Heavens and the Waters above the Firmament of Heavens.

And in here we close this Second Day of the Genesis. Moses saw the Picture without understanding the Science; we understand the Science and describe the Picture.

One millennium here and another there, what means for God?

You write it, you read it, who's the Author?

Wonder follows wonder and I say God is Wonderful.

By now, I guess, you can perfectly describe the series of events that took place in the Day coming, right?

SECTION THREE
CREATION OF THE ANGULAR ROTATION OF THE AXIS OF
THE ECOSPHERE
(AUTONOMOUS ECOSPHERIC SYSTEM)

CREATION OF THE KINGDOM OF THE PLANTS

- 1.-Under the pressure of Earth-Sun System's Forces the waters of the Ocean Mother descended
- 2.- Pushed up by the Seismological Power of Earth's core the Feet of Continental Shield were raised.
- 3.-The Ocean Mother gave birth to the seas.
- 4.-The angle of Earth's Rotational Axis became fixed by the penta-continental structure of the Planet
- 5.-The Kingdom of the Plants began to colonize the lands beneath the Sun and gave origin to the Prehistoric Forest.
- 6.-By the photosynthesis, the kingdom of Plants began to change the chemical composition of the Prehistoric Atmosphere.

These things took place during the Third Day of the Creation of our Universe.

THE ANGULAR ROTATION OF THE AXIS OF THE ECOSPHERE
(AUTONOMOUS ECOSPHERIC SYSTEM)

Laws are to be followed. Creation is not magic. Intelligence is the root of Creation. Science is the book of laws ruling the relation between energy and matter. No matter who you are or the level of your Intelligence, facts are facts.

God is not a magician. God is intelligence. He knows by heart every single line of every single chapter of the Books of the Sciences ruling the relation between energy and matter. The numberless particular sciences filling with their numberless chapters the Book of the Universal Science, God has fixed them all together into a single Volume: The Science of Creation.

The reason why He has preserved the Bible from being opened and read by anyone through all these three millennia and a half from Moses to this day going on is written in the *Divine History of Jesus Christ*. This is no place for wasting our time in explanations already on the table. The rhythm of these lines asks us to keep on looking ahead. And I shall.

There was Night.

The NIGHT is the time when the inner laws set to harmonize the different parts of the body and without any external government maintain alive the structure created.

Every time God finished His daily work, He left the inner laws set on motion to do their work. Let us walk on this stage.

The Physical Equilibrium of the Ecosphere of a Planet born to be Mother of Life got to be built on the top of one mountain of Mathematical equations before proceeding to its Creation. The Creation of the Three of Life takes time. Life is not an experiment. God plays not dice. We speak of Geological Ages. And Time needs equilibrium.

At the end of this Third Day, Looking at Earth from the distance, a phenomenon struck the eyes. The continents were occupying one alone of the two hemispheres of the Planet. The other hemisphere was entirely under the Waters of the Ocean Mother. The reason why, comes next.

For a certain body set on rotation around its own axis, the angle of rotation will depend on the distribution of matter over its surface.

Talking about a Planet this angle of rotation shall be given by the amount of mass concentrated over one of its two hemispheres. This is a quite common law of Natural Physics.

If you want to make bigger the angulation of the Axis of the Earth, you only must add mass over the hemisphere already loaded.

And vice versa if you want to lighten the Angle of Rotation you reduce that mass.

The question comes: Why did the Earth's Axis need a certain angle of rotation?

Let us focus on facts.

Look at the Globe of the Earth. Set your eyes on its two hemispheres. You see this: One hemisphere of the Earth belongs to the water of the Ocean Mother; the other hemisphere is home to the five continents.

As you know the density of the water is lower than the density of dry land. If we level both by conversion of the water in dry land the shape of the Earth would show a quite different face. If we could, we should see how the distribution of dry land over the surface of the Penta continental hemisphere causes the angular rotation of the Earth to be the one it is.

Next question comes: Has it been always, from the very beginning, like this?

Let us put it this way. A Biosphere based on an Autonomous Mechanism of Refrigeration, and this Autonomous Mechanism of Refrigeration based on a Bipolar Mass of Ices, if left alone over a Lithospheric Ring moving chaotically above a Mantle subjected to a geophysical Core whose astrophysical Pulse is

related to the Pulse of the Sun, this simple and natural physical fact would mean an out-of-control defrozelement of those two Thermodynamic Generators on which Geological Equilibrium the temperature of the Biosphere is based.

The Creation of the Tree of Life is based on a System in Equilibrium whose Equation integrates Time as Internal Factor. Evolution is written in Time from Beginning to End.

Earth moves in a Space, the Solar System, which is moving inside a Stars System related to universal forces continually moving on from a level of energy to another. The triumph of creation of life to God's Image is not a small matter; it implies the mastery of sciences touching all kind of scientific levels, from Geology to Astrophysics, from Biology to Sociology, from the Atom to the Stars. The voyage from the elemental living animal cell to the complex spiritual life of the Mind at the Image of God is the Revolution by God Himself set in the heart of the Cosmos.

God means not failure.

He goes for Victory.

And this cannot be reached but by integrating, from the very Beginning, Time in the Equation.

From the very Beginning of its Creation, born to be Home to Man, Earth's Biosphere needed to be protected with one all-powerful shield from those up and downs of the Space in which the Sun is moving. God had to create to Earth, and He did, a Lithospheric Ring turning around the Mantle as a Solid Shield always presenting a same face to Heavens. He created this Shield giving to the "dry land" Hemisphere the Penta continental Shape it has from the Beginning of this Third Day.

God forged this Structure during the Solidification of the Crust, in the Evening of the First Day.

We can see the effects of this displacement of mass straight over the surface of the beds of the seas between the continents. This Formation had place during the solidification of the Crust.

At the end of the First Day the falling of the Temperature of the Mantle reached its minimum level.

While this Temperature Fall was on the run, profiting by the state of mid-liquation that the Crust had, God carved the Penta continental Shield by displaying those forces whose tracks can be seen in the bed of the seas between the continents.

As the temperature of the Earth's Core kept falling, by the isolation from any external source of energy this falling dragged the Mantle down with it.

Isolated from the Core's heat and from the Outer Space's, the Crust of the Earth became a Ring moving like a Solid Wall.

The Sublimation of the Primary Atmosphere had its effect on the lithospheric Ring too.

The temperature at which the Penta continental Shield closed its structure was equal to Zero Absolute. Hence, the nature of the Ices of the Polar Caps, on one hand; and on the other, the Indestructibility of the Lithospheric Ring.

We understand that God did not only displayed Time in the heart of the Equation of the Creation of Earth's Axis Angle of Rotation; but that He also counted on the Nature of the Forces existing in the Space where Earth was to be placed after.

I Know, you have been instructed and manipulated to believe that Hazard is the Mother of Creation. According to this wrong ideology, in whose universe you are nothing but pawns in somebody's else game, the Five Continents have been reshaping their faces all along the Ages of Earth. Think! This reshaping along the Ages would imply a continual destruction of all forms of life under the changes of the levels of solar energy entering the Biosphere, in one hand; and on the other, the changes of the chemical composition of the atmosphere out of the uncontrollable mechanism of disruption of the tectonic bodies. In that case the Ring of Fire should have been in an out-of-control journey through the Earth.

No matter how you think of it, only an ignorant watching the universe from a single point of view, this is to say, from a particular scientific discipline, can come with this picture.

The Victory of Life on Earth from animal to Spiritual Mind implies working with many scientific disciplines to recreate the frame to the picture by God painted for us in Genesis.

*CONCLUSION OF THIS FIRST VOLUME ON THE CREATION OF THE
UNIVERSE ACCORDING TO GENESIS*

I had introduced you to these first Days of Genesis following the Path by God left to me to walk on. Mine is a general picture. God will call to stage those who will enter in the picture and taking a part of the whole will develop from inside the laws and forces related to this general picture. In the meantime, I will keep leading the march through the Days of the Creation. In the next Volume of this Book devoted to the Memoirs of the Creation of our universe new wonders await to be come to light. Until then, enjoy this Volume.
